## **DETAILED ACTION**

### ***Election/Restrictions***

1. Claims 1-25 and 34-35 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/20/05.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 26-33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 26 now recites "mixing... in a screw conveyor... and said moisture level is reduced to "y" wherein  $y < x$ ". Applicant defined "y" as being the "final moisture level" on page 4. There does not appear to be support for defining the intermediate moisture level produced by the screw conveyor as being equal to the "final moisture level".

### ***Response to Arguments***

Art Unit: 1761

4. Applicant's arguments filed 6/19/06 have been fully considered but they are not persuasive.

Applicant argues that support for the amendment was provided by paragraph 0021 of the published application. However, that paragraph does not define "y" and does not refer to the final moisture level of the product.
